

Newest Youth Council sworn-in

By Micheal Rios

Way back in the simpler times of 2015, then President Barack Obama issued a call to action at the United National Indian Tribal Youth (UNITY) annual conference. He referred to this call to action as “the first step in engaging a broad network of people interested in addressing the issues facing Native youth and creating a platform through which Native youth can access information, opportunities and resources. [Most Importantly, to] have their voices and positive contributions highlighted and elevated.

Ryan’s REZ-ipes: From best- kept-secret to a countrywide fan favorite

*By Calvin Valdillez; photos courtesy
of Ryan Gobin*

Six years ago, a Tulalip man took a leap of faith and gave up his ten-year career as a police officer for his love and passion of food. Briefly opening a concession stand outside of the local CrossFit gym, Ryan Gobin began serving up tasty dishes to the tribal community, and the response he received from that endeavor led him to the investment of a small food truck.

STICK GAMES BID MEETING

THURSDAY, FEBRUARY 24, 2022

**Tulalip Tribal members,
are you interested in placing a bid to be
the Contractor for the 2022 Tulalip Stick Games?**

If so, you must attend the mandatory pre-bid meeting to be considered. The meeting takes place at the Tulalip Tribal Government Administration building, located at 6406 Marine Drive, in Tulalip.

**The meeting will take place in room #162
on February 24, 2022 at 1:00pm**

The meeting should last no longer than 60 minutes. This meeting is for the Events Department to give information regarding the details of the bid. All that you need to bring with you is paper and a pencil to take notes.

The Tulalip Tribes are successors in interest to the Snohomish, Snoqualmie and Skykomish Tribe and other tribes and bands signatory to the Treaty of Point Elliot, January 22, 1855

Youth Council from front page

“We want to give those young people and young Native American like them the support they deserved,” the former President continued. “We have to invest in them, and believe in them, and love them. And if we do, there’s no question of the great things they can achieve – not just for their own families, but for their nation and for the United States.”

Those words inspired the next generation of Tulalip leaders to heed the call to leadership. The teenage youth thoughtfully and expeditiously created the first-ever Tulalip Youth Council as a result. Since it’s inception seven years ago, Youth Council continues to develop excitement amongst our young people to engage in cultural activities and local events, while proudly representing the youth voice at Board of Director’s meetings.

The latest rendition of youth leadership, known as the 2022 Tulalip Youth Council, was sworn-in by Chairwoman Teri Gobin on Saturday, February 5th.

Prior to being sworn-in, each attending youth took a moment to introduce themselves in the traditional way. Tribal leadership was stunned as a majority of young culture bearers spoke Lushootseed while introducing themselves and shared who their parents and grandparents are.

“This is the first time I’ve heard so many youth speak Lushootseed, our language, in the board room or anywhere else for that matter,” marveled Board of Director Glen Gobin. “To be able to open up and share what’s been handed down to you from our ancestors shows the passion each of you has to learn and embrace our culture. Our elders are so encouraged to know our Tulalip youth are bringing the language back.

“It’s so important we have youth be involved in our Tribe and to know who we are as Tulalip people. One day, members of this Youth Council will be sitting here as Board of Directors because you were willing to stand up, be involved, and actually care about what’s happening in our community. I am encouraged and feel secure knowing we have future leaders who want to learn, understand, and provide for the next generations. Your Tribe is proud of you.”

After taking their oaths and offering handmade necklaces to the Board of Directors, the three attending Senior members of Youth Council, all of which just so happen to be 15-years-old, offered their vision for the next year.

“My mission is to continue working towards getting drugs off our Rez,” shared chairman Image Enick. “By bringing more awareness to the drug problem, getting tribal members in need in contact with services that can help them get clean, and hosting events like Get Drugs Off Our Rez rallies, we can all work together to accomplish this mission. An important piece of this includes breaking down the drug issue to our young ones, at elementary and middle schools, because they are affected, too. They need to know what the devastating effects of drugs are so they aren’t tempted and know what can happen if they do drugs.”

Vice-chair Faith Valencia said, “My goals are more about cleaning up our community, like removing garbage from our streets and neighborhoods and getting more people to recycle. I’d like to see more recycle bins at our common areas so that people have

more of an option to recycle than just throwing everything away. By having more community clean-ups we can reach more people and help make them aware.”

Treasurer Johnathon “JD” Rinker added, “I’d really like to see more of an effort to get our community garden going. Having our people learn to garden, understating the different types of soil needed

Continued on next page

for growing plants and vegetables can make a big difference in getting more people healthy. We have people with records that can't get jobs, so by creating job opportunities for them at the garden they can get their life back together and learn a valuable skill that they can teach others."

In attendance at the swearing-in were two previous Youth Councilmembers who wanted to support their fellow tribal members. Eighteen-year-old Evelyn Vega-Simpson and seventeen-year-old Sebastian Gomez spent the previous two years as officers on Youth Council and shared how their time in leadership positions helped them grow as individuals and gain invaluable experience for future endeavors.

They shared that a definite highlight of their time on Council was creating a Wellness Warrior video that won 2nd place at the UNITY conference, while also being very proud of creating the first-ever Tulalip Pride Walk. They also spoke of the multiple collaborations with Tulalip departments and services in gaining more momentum for community-based events.

"For me, being on Council during the pandemic meant we become a source of positivity and optimism for our people. Always looking at the bright side that we had each other and being part of a community that cares for one

another," said Sebastian. "I was very shy when I first joined, but quickly had to learn to speak to people I didn't know and gained so much public speaking experience. Ultimately, I learned to step outside my comfort zone and be more confident in myself and my abilities."

"When I joined initially it was to not only help the community but to learn more of our language and about our shared culture," added Evelyn. "Through all the experiences and events we got to attend and be a part of, we learned more and more about the culture. What it means to be Tulalip and how to represent ourselves as Tulalip tribal members. So when I look back at the last few years I'm really thankful for the opportunity to get to know more about the community and to have met so many of our people."

While no official projects have been decided on yet, the newest version of Tulalip Youth Council will meet regularly under the guidance of their advisor, Shane McLean. Many of the newest members said they hope to participate in national events and do some travelling like previous Councils have done. Their shared optimism lies in working in their community and volunteering with local organizations and schools to address what they view are areas of most concern.

We wish them the best of luck and look forward to updating our readers on future Youth Council activities.

Official Roster

Sr. Council:

Chairman- Image Enick
 Vice Chairman- Faith Valencia
 Secretary- Calista Weiser
 Treasurer- Johnathon Rinker.

Jr. Council:

Chairwoman- Kyla Fryberg
 Vice Chairman- Bradley Paul-Williams
 Secretary- Terrance Nguyen
 8th grade rep- Able Charley
 7th grade reps- Kileea Pablo & Arielle Valencia
 6th grade rep- Aylani Lewis
 Media Coordinator- Elijah Cheer & Faith Iukes

Youth Council Advisor- Shane McLean

Ryan's REZ-ipes from front page

After hitching a smoker to the food truck, he held a competition online asking his friends and family for ideas on what to call his new restaurant-on-wheels. With a name and a very interested and hungry patronage, Ryan's REZ-ipes officially opened up shop in 2016.

Serving up the likes of frybread, truffle fries, pulled pork sandwiches and tacos, burgers, shrimp bowls and a variety of weekly specials and experimental dishes, Ryan's REZ-ipes has gone from a locally known best-kept-secret to a countrywide fan favorite with thousands of followers on social media. Many self-proclaimed foodies and food industry professionals alike often tag their friends on Ryan's photos with a comment along the lines of 'we gotta try this'. Ryan's REZ-ipes is now available through delivery services such as DoorDash and he even began selling some of his signature spices and mixes for

you to try at-home.

Ryan's journey is the perfect blueprint for up-and-coming tribal entrepreneurs to follow. From a concession stand to a shiny beauty of a food truck, he has grown his brand incredibly over the past several years, incorporating a Native American logo and adding catering to the business. It's gotten to the point that whenever you see his blue food truck, your stomach might growl and your mouth will more-than-likely water just thinking of his Indigenous and multi-cultural inspired cuisines.

When he was first getting his start, Tulalip News sat down with the tribal chef and businessman to talk about the inspiration behind his new venture, to which he responded, "I first got into cooking in my teen years. I have lots of family members that are amazing cooks and have been taught many recipes from all of them. I watched when people cooked in my younger years and began try-

ing my own recipes. I could name everyone I learned from, but that would be a long list.”

With six successful years under his belt, Ryan recently took some time out of his very busy schedule to talk with Tulalip News once more about his passion for cooking and growing his business, as well as to discuss all the success he’s had since first beginning his culinary experience.

Since we last spoke, Ryan’s REZ-ipes has continuously leveled up every year. Can you talk about your journey since then? What has been a few of the major highlights of the business over the years?

I’d have to agree with leveling up! The business has definitely taken off at a rapid pace since the upgrade of a new food truck. The amount of events and weddings have quadrupled in the past two years and are continuing to increase. I already have 18 weddings booked for 2022, and I am still getting more requests weekly.

You mentioned the new truck, can you touch upon some of the truck’s features and equipment? How has that benefited your dream of serving tasty dishes to the community?

Having a new food truck has helped immensely - having all

brand-new equipment and an on-board smoker. Instead of having to plug multiple warmers in a power source, and having to use a loud generator mounted on the back, I now have professional plumbed propane heating warmers, a fryer and a flat top griddle.

It’s the Cadillac of food trucks. I even incorporated a stereo system that sounds like an outdoor nightclub and LED lighting to create a colorful ambiance. Since having this truck and showing others the potential of what can be done, I now have had over a dozen other food truck owners coming to me for advice, from multiple states across the U.S.

You have a lot of new items on the menu and many of them have cultural ties. What are some of those dishes and what is the inspiration behind some of those popular plates?

I have multiple new items and some of my oldies too. Over the years I’ve utilized my skills with trial and error - making everything better and better, and finding where to gather those ingredients to achieve the best quality.

I’ve been all over the board in bettering different items, such as my marinades, creating more sauces, my seasoning rub for my smoked pork and coming up with desert toppings for frybread. Years ago, I was selling frybread and always

ended up running into issues where it just wasn’t perfect every time, it was either too heavy or just didn’t look right. I was given my Grandma Nonie’s recipe years ago and I just couldn’t get it right, so I gave up. This past year I tried again, but told myself I wouldn’t stop trying until I got it exactly how I want it - fluffy and perfect. I achieved my goal and now sell my own Ryan’s REZ-ipes fluffy frybread mix in professionally sealed pouches.

I love to travel and experience new kinds of foods everywhere, which is how I came up with a few of my dishes like my Korean-style kalbi steak, my Hawaiian-style chicken tacos and even my shrimp dishes. Whenever I try something and just crave it, I figure out how to make it myself, then I put my own twist on it. Different cultures have their own kind of traditional flavors, and they all inspire me to create

explosive flavors that make your tastebuds dance. It’s pretty obvious that I’m greatly inspired by the Hawaiian Islands just by seeing a lot of the dishes I choose, such as one of my recent specials the loco moco with fried rice, which is a Hawaiian traditional dish. You will also see Hawaiian shaved ice on my menu, which actually originated in Japan.

After cheffing it up over the years, you are obviously still very passionate about cooking and providing meals to the people. What motivates you and fuels your drive now that you are living your dream?

My passion continues to grow the more I see smiles on everyone’s faces after they eat my food. It enhances my drive to continue to figure out new dishes and to give everyone new foods to try. I now have over 8,000 followers on

Continued on next page

social media, so my foods are seen across the U.S. and also in other countries. That drives me to want to build an even larger business, which will happen in due time.

Catering is now a big aspect of Ryan's REZ-ipes that I don't believe you were doing yet at the time of the last article. Could you talk about your catering options and the process? What are some of the events you've catered this far and what makes catering enjoyable for you?

Catering is huge in the food industry. I have now catered over 150 events and still growing daily. We cater anywhere from 100 people to 1000. I have catered multiple birthdays, corporate events, baby showers, celebrations of life, weddings and we even catered last years Tulalip employee day at the amphitheater. I love it because

food makes everyone happy. I also cater weekly for a company that is building an all-electric airplane, over 100 employees each week. I have a large catering menu to choose from and that can be located at ryansREZipes.com.

Can you talk about some of the new and exciting updates happening at Ryan's REZ-ipes?

My newest update is that I'm adding garlic rosemary truffle fries and frybread to my menu, and I will be finding new unique ways of utilizing them, such as adding dessert toppings, or pairing with a hickory smoked hot dog and a number of toppings. One update that I'm happy to announce is I will be looking to add a food trailer to the fleet. I will be separating the shaved ice from the food truck. This will allow me to have more room to focus on shaved ice and Lotus drinks with amazing

toppings, and maybe even cotton candy will be added to the mix! We will also do dessert frybread there, so it will basically be more of a dessert trailer.

Ryan's REZ-ipes serves as an inspiration to many tribal members and proof that you can follow your life's passion, not only to aspiring chefs, but to all tribal entrepreneurs as well. Any words of advice for those just starting out, or those who are looking to start their own business?

The best advice I can give to those that would like to start their own business is never give up - ever. You will have doubts and there will be a lot of roadblocks. You just need to always remember that nothing is ever instant. It can take years to create the profits you aim for, not days, weeks or months. Trial and error is key. If you make

a mistake, learn from it and keep pushing forward in a good way. Lastly, make small goals and work daily to achieve them. No matter how small the achievement is, it's still an achievement.

What are your typical hours and where can people find you? Any upcoming events or anything new on the horizon you'd like to share?

In the upcoming months and years, our locations, days we're open and times of operation will change, being it's a food truck that serves food and does private catering as well. But typically, right now, we're located at the Tulalip Market which is a great location. We are there Thursday - Saturday and every other Sunday. Those days and locations will even rally change though. So, you can stay up to date by following the Ryan's REZ-ipes Facebook page.

Elders, veterans head to LA for Super Bowl experience

By Micheal Rios; Photos by Malory Simpson

Over 112 million viewers tuned in to watch this year's Super Bowl clash between the Los Angeles Rams and Cincinnati Bengals. Among the sold-out 70,240 person crowd that travelled to L.A. to witness the big game in person was a very lucky group of Tulalip tribal members.

Made possible by a recently announced partnership with DraftKings, Tulalip leadership raffled off exclusive suite tickets to tribal elders and veterans. The lucky benefactors were Maurice "Hammer" Alexander, Rocky Renecker, John Ancheta, Nancy Koehler, Sara Andres and Patricia Balderson. Plus their official escort, events manager Malory Simpson.

"The experience was definitely once in a lifetime!" shared Malory. "We were able to attend some events hosted by

DraftKings, one on Saturday night and a tailgate party the day of the Super Bowl game. There was tons of free food and drinks, as well as a concert by Wyclef Jean, which was absolutely amazing. It was great to hear live music after COVID, you know?!

"The suite was immaculate and filled with lots of food, drinks and hospitality," she added. "The group of elders and veterans made my job easy. I am so grateful for the time I got to spend with each of them. Big thank you to the Board of Directors for the tickets, to our Travel Department for booking our flights and shuttles, and the CEO staff for thinking of me to escort our elders to Super Bowl LVI."

Local artist Walter Moses created a special piece for the occasion that was gifted to the DraftKings representative by the group at the stadium. "I can tell you she

was grateful to be gifted such a stunning piece of artwork. She mentioned to us that she's never been gifted a piece of art from her clients before," said Malory.

The football event watched around the world featured a thrilling game that went down to the wire, an exciting halftime show starring hip hop legends, and a \$5 billion SoFi Stadium venue

in Los Angeles that added a uniquely Hollywood flare. For the Tulalips in attendance, memories were made and experiences had that are sure to last a lifetime.

"I had an amazing time," shared Tulalip veteran Sara Andres. "I was super happy to be given this once in a lifetime experience and to be able to share it with the others. I am so thankful

the Board of Directors offered the tickets to Tulalip elders and veterans. Having been the third alternate called, I didn't think I would be going. I am very grateful for the winners that gave up their opportunity for me to be able to attend. I will never forget Super Bowl LVI. GO Rams!"

2020 TULALIP UTILITIES WATER QUALITY REPORT

CONTACT INFORMATION:

Please contact the numbers listed below if you would like more information about this report or for any questions related to your drinking water:

EPA's Hotline: 1 - 800 - 426 - 4791 Tulalip Utilities (360) 716 - 4840 TUA Fax: (360) 716 - 0700
Gus Taylor (360) 716 - 4011 Mike Leslie (360) 716 - 4840

Is my water safe?

We are pleased to present this year's Annual Water Quality Report (Consumer Confidence Report) as required by the Safe Drinking Water Act (SDWA) this report is designed to provide details about where your water comes from, what it contains and how it compares to standards set by regulatory agencies. This report is a snapshot of last years water quality. We are committed to providing you with information because informed customers are our best allies.

How can I get involved?

At this time we do not hold public meetings on a regular basis. You may contact our office at 360-716-4840 for any inquiries questions or concerns that you may have.

Is it ok to drink water from a garden hose?

Many hoses are made of PVC, a material that uses lead as a stabilizer. When water settles in these lead based hoses the concentration of lead increase 10 to 100 times the allowable limit set by the environmental health agency. However, you can purchase lead free hoses from your local store. Make sure that they state, "drink-safe", or, "safe for potable water" or "lead-free". This indicates that they are plated with nickel as opposed to lead.

"Lead poisoning interferes with a variety of body processes and is very toxic to many of our organs and tissues. It interferes with the development of Our nervous system, thus is very harmful to the developmental process of our children so be sure to purchase hoses that will be safe for them play in and drink water from.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency (EPA) Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring and, in some cases radioactive material and substances resulting from the presence of animals or from human activity: microbial contaminants such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants such as salts and metals which can be naturally occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas productions, mining, or farming; pesticides and herbicides which may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses; chemical contaminants including synthetic and volatile organic chemicals which are by-products of industrial processes and petroleum production and can also come from gas stations, urban stormwater run-off and septic systems.

In order to ensure that tap water is safe to drink the EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems (PWS). Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

How can I help conserve water?

The average U.S household uses approximately 400 gallons of water per day or 100 gallons per person per day. There are many low-cost and no-cost ways to conserve water. Small changes can make a big difference! There are many ways in which you can help to conserve water:

- Take short showers-- a 5 minute shower uses 4 to 5 gallons of water compared to up to 50 gallons for a bath
- Shut off water while brushing your teeth, washing your hair and shaving and save up to 500 gallons a month
- Use a water-efficient showerhead. They are inexpensive, easy to install and can save up to 750 gallons a month
- Run your clothes washer and dishwasher only when they are full. You can save up to 1,000 gallons a month
- Water plants only when necessary
- The average car wash uses over 30 gallons of water
- Fix leaky toilets and faucets. Faucet washers are inexpensive and take only a few minutes to replace. To check your toilet for a leak place a few drops of food coloring in the tank and wait. If it seeps into the toilet bowl without flushing you have a leak. Fixing it or replacing with a new model can save up to 1,000 gallons a month
- Adjust sprinklers so only your lawn and flowers are watered. Apply water only as fast as the soil can absorb it and only water during the coolest parts of the day to reduce evaporation.
- Teach your kids about water conservation to ensure future generations use water wisely. Make it a family effort to reduce your water bill!
- Visit www.epa.gov/watersense for more information

Frequently Asked QUESTIONS

ADDITIONAL INFORMATION FOR LEAD:

If present elevated lead levels can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Tulalip Utilities Authority is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours you can minimize your lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants may be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. The U.S. EPA/CDC (Centers for Disease Control and Prevention) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline at (800) 426-4791 or <http://water.epa.gov/drink/hotline>

How is my water treated?

Your water is treated by disinfection. Disinfection involves the addition of chlorine or other disinfectant to kill dangerous bacteria and microorganisms that may be in the water. Disinfection is considered to be one of the major public health advances of the 20th century.

How much water is used in a typical shower?

The Federal Energy Policy Act (FENPA) set a nationwide regulation that limits showerheads to a maximum flow of 2.5 gallons per minute (GPM). Showerheads made before 1980 are rated at 5 GPM. Since the average shower is estimated to last 8.2 minutes, the old showerheads use 41 gallons of water while the newer, low-flow showerheads use only about 21 gallons.

How many contaminants are regulated in drinking water?

The U.S. EPA regulates over 80 contaminants in drinking water. Some states may choose to regulate additional contaminants or to set stricter standards, but all states must have standards at least as stringent as the U.S. EPA's. Each well site has there own set of standards and regulations that are imposed and carefully supervised year round.

Where can I find source water assessment and its availability?

You may contact Tulalip Utilities at 360-716-4840 to inquire about this information.

How can I help protect our valuable source water?

Protection of drinking water is everyone's responsibility. There are a number of ways in which you can help to protect your communities water source:

- Eliminate excess use of lawn and garden fertilizers and pesticides-- they contain hazardous chemicals that can reach your drinking water source.
- Pick up after your pets.
- If you have your own septic system, properly maintain your system to reduce leaching to water sources or consider connecting to a public sewer system
- Dispose of chemicals properly; take used motor oil to a recycling center
- Volunteer in your community. Find a watershed or wellhead protection organization in your community or visit the Watershed Information Networks How to Start a Watershed Team.
- Organize a storm drain stenciling project with your local government or water supplier. Stencil a message next to street drains reminding people "Dump No Waste-- Drains to River" or "Protect Your Water." Produce and distribute a flyer for households to remind residents that storm drains dump directly into your local water body.

Why do I get this report every year?

Community water system operators are required by Federal law to provide their customers an annual water quality report. The report helps people make informed choices about the water they drink. It lets people know what contaminants, if any, are in their drinking water and how these contaminants may affect their health. It also gives the system operators a chance to tell customers what it takes to deliver safe drinking water.

"It is our goal to provide adequate safe drinking water for everyone in our community."

MADISON ESTATES #105300144						
CONTAMINANTS	DATE	RESULTS	MCLG	MCL	VIOLATION	LIKELY SOURCE OF CONTAMINANT
Chlorine (ppm)	2020	0.3 - 0.4	MRDLG = 4	MRDL = 4	NO	Water additive used to control microbes
**Arsenic (ppb)	2019	4.6	0	10	NO	Erosion of natural deposits; Run-off from orchards and glass/electronics production wastes.
Barium (ppm)	2019	0.0099	2	2	NO	Discharge of drilling waste/metal refineries; Erosion. Can increase blood pressure
Chromium (ppb)	2019	2.7	100	100	NO	Discharge from steel and pulp mills; erosion of natural deposits.
Nitrate (ppm)	2020	0.604	10	10	NO	Runoff from fertilizer; Septic tank/sewage leaching; erosion
Sulfate (Mg/L)	2019	12.2		N/A	NO	A naturally occurring mineral in rocks. It is not harmful for you but may cause water to smell unpleasant.
CONTAMINANT	DATE	90th PERCENT	AL	# OVER AL	VIOLATION	LIKELY SOURCE OF CONTAMINANT
Copper (ppm)	2018	0.564	1.3	0	NO	Erosion; Leaching from wood preservatives; Corrosion of household plumbing

TULARE ESTATES #105300155						
CONTAMINANT	DATE	RESULTS	MCLG	MCL	VIOLATION	LIKELY SOURCE OF CONTAMINATION
Chlorine (ppm)	2020	0.8 - 1.1	MRDLG = 4	MRDL = 4	NO	Water additive used to control microbes
HAA5 (ppb)	2019	6.5	No goal for the total	60	NO	By-product of drinking water disinfection
TTHM (ppb)	2019	18.7	No goal for the total	80	NO	By-product of drinking water disinfection
** Arsenic (ppb)	2019	2	0	10	NO	Erosion; Run-off from orchards; glass/electronic production wastes
Barium (ppm)	2019	0.0068	2	2	NO	Discharge of drilling wastes/metal refineries; Erosion. Can increase blood pressure
Fluoride (ppm)	2019	0.14	4	4	NO	Erosion; discharge from fertilizer and aluminum factories; Water additive which promotes strong teeth
Nitrate (ppm)	2020	0.01	10	10	NO	Run-off from fertilizer use; Septic tanks/sewage leaching; Erosion
CONTAMINANT	DATE	90th PERCENT	AL	# Over AL	VIOLATION	LIKELY SOURCE OF CONTAMINANT
Copper (ppm)	2019	0.1086	1.3	0	NO	Erosion; Leaching from wood preservatives; Corrosion of household plumbing

** While our drinking water meets EPA's standard for arsenic, it does contain low levels of arsenic. EPA's standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems. (40 CFR§141.155)

IMPORTANT DRINKING WATER TERMS & DEFINITIONS

Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to MCLGs as feasible using the best available treatment technology and taking cost into consideration. MCLs are enforceable standards.

Maximum contaminant level goal (MCLG) - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLG's allow for a margin of safety.

Maximum residual disinfectant level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that the addition of a disinfectant is necessary for control of microbial contaminants

Maximum residual disinfection level goal (MRDLG) - The level of drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.

ACTION LEVEL (AL) - The concentration of a contaminant that, if exceeded triggers treatment or other requirements that a system must follow.

ABBREVIATIONS:

Mg/L - Milligrams per liter
 PPM - Parts per million
 PPB - Parts per billion
 TTHM: Total Trihalomethanes
 HAA5: Haloacetic Acid

DELIA JIMICUM

The Delia Jimicum system consists of 12 residential connections serving approximately 42 persons. The water is supplied by one ground water well, with a 5,000 gallon capacity storage tank. Water production is estimated at 2,100 gals/day. Disinfection is accomplished by injecting dilute sodium hypochlorite solution when the well pump is pumping to the reservoir.

IN THE MUCKLESHOOT COURT OF JUSTICE FOR THE MUCKLESHOOT INDIAN RESERVATION, AUBURN, WASHINGTON. Case No. MUC-PO-08/20-092 In Re the Protection of: M.C., DOB: 09/20/1949, an elder/vulnerable adult vs. RICKY RYAN WILLIAMS, DOB: 06/16/1991, Respondent. NOTICE PERMANENT ORDER FOR PROTECTION. TO: RICKY RYAN WILLIAMS, DOB: 06/16/1991 IT IS HEREBY ORDERED THAT the previously entered protection order remains in full force and effect. In particular:

1. The respondent is Restrained from committing or threatening to commit physical harm, bodily injury, assault, including sexual assault against the vulnerable adult and from molesting, harassing, or stalking the elder/vulnerable adult.
2. Respondent is Restrained from committing or threatening to commit acts of abandonment, abuse, neglect, or financial exploitation against the elder/vulnerable adult.
3. The respondent is Excluded from the elder/vulnerable adult's residence.
4. The respondent is Restrained from coming near and from having any contact with the elder/vulnerable adult, in person or through others, by phone, mail, or any means, directly or indirectly, except through an attorney, or mailing or delivery by a third party of court documents.
5. Respondent is Prohibited from knowingly coming within, or knowingly remaining within 500 feet (distance) of the elder/vulnerable adult and his or her residence.
6. A violation of this order may subject respondent to arrest and criminal prosecution under tribal and/or state law.
7. The protection order expires January 28, 2023 but may be renewed prior to its expiration.
8. Next hearing: December 22, 2022 at 11:00AM
9. Parties are responsible for updating the court as to any change of service address.

SO ORDERED this 27th of January, 2022.

/s/ GARY BASS, CHIEF JUDGE OF THE MUCKLESHOOT COURT OF JUSTICE.
